### **Public Service Announcement**

The City of Whitewater Water Utility's semi-annual water main and hydrant flushing program will begin on Monday October 13th and will conclude Friday, October 17th. Flushing of the water mains is necessary in order to continue to deliver clean safe water to our citizens. If we have repairs more than expected throughout the week we may have to continue flushing into the following week.

Flushing of the water mains and hydrants can cause some discoloration of the water. Caution should be exercised in washing of white clothing. Discoloration of the water due to flushing WILL stain white clothing. We notify the public in all the local media possible therefore we can not be responsible for stained clothing. If discoloration is detected, run the cold water faucet until the discoloration clears. While we are still flushing in your area the water may take a little while to clear up. You may want to wait until we have left the area and the water has settled down before running your water tap. If reduced pressure is experienced after flushing you may have to clean the aerators on your house faucets. Thank you in advance for your patience if you experience any inconvenience.

If you have any questions, please contact the Water Utility at 473-0543 or the Public Works office at 473-0540.

(PSA Hydrant Flushing Doc.)
