Re: City Position on Whitewater Aquatic and Fitness Center (WAFC)

City Council and Staff Position on WAFC

- 1) We believe in the importance of the Facility as it exists to the City, School District and Community including the Fitness Center, Lap Pool and Leisure Pool.
- 2) The facility is a value to the school, city, and surrounding region as a joint venture that is supported by the financial contributions by city and school district resources along with financial support from membership, program revenues and community contributions.
- 3) We acknowledge opportunities for continuous improvement for facility and operational needs and are committed to these improvements, including membership growth, facility updates and visibility within the region.
- 4) We are committed to communicating and partnering with the school district to provide for operational and capital financing that allows both entities to provide excellent service.
- 5) It is the goal of this body to continue our partnership and accomplish our shared goals without going to referendum.
- 6) Both the City and School District have contractual obligations under previous and ongoing agreements that must be honored to resolve the accumulated deficit.
